Authorized to work in Canada (PGWP), no sponsorship required

SUMMARY

Full-stack developer working across React/TypeScript front-ends and Node.js/Express back-ends, with hands-on experience building custom web tools, dashboards, and API integrations backed by Supabase and PostgreSQL. Designs and builds RESTful APIs and service integrations independently, and owns features end to end from design through deployment and debugging. Comfortable with data structures, algorithms, and object-oriented design, and ships through Git-based CI/CD and Agile delivery with AI-assisted development tools in the daily workflow.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Redux, React Hooks, Context API, Vite

Backend & Data: Node.js, Express, RESTful APIs, PostgreSQL (SQL), Supabase (Row-Level Security), Firebase/Firestore (NoSQL)

APIs & Integrations: Building and consuming REST APIs, microservice integration, concurrent third-party integrations (GitHub API via Promise.all), auth-gated admin tooling, data visualization (Recharts)

Delivery & Tooling: Git/GitHub, CI/CD (GitHub Actions), Jest unit testing, Agile and SDLC practices, peer code review, troubleshooting (Chrome DevTools), AI-assisted development

Fundamentals: Data structures, algorithms, object-oriented design, cloud-hosted deployments

Also familiar with: Django, Angular, Vue.js

EXPERIENCE

Full Stack Developer | Technetics IT Services, India

July 2023 to July 2024

- Built responsive, reusable React and TypeScript UI components across 5 production applications, collaborating within a 2 to 3 person Agile team to keep feature work scoped and on schedule.
- Connected front-end applications to backend services and third-party data sources by engineering RESTful API integrations between React clients and Node.js/Express microservices.
- Upheld product quality and performance across 5 shipped applications by troubleshooting production issues with Chrome DevTools and writing Jest test suites, with all changes validated through peer code review.
- Kept releases on schedule by delivering code through Git/GitHub Actions CI/CD pipelines, working within a fast-moving, lean Agile team.

PROJECTS

VitalPath, Full-Stack Fitness Tracker | Next.js 16 · React Server Components · PostgreSQL · Tailwind CSS · Vercel

- Implemented session-based authentication with cryptographically random tokens stored as SHA-256 hashes in httpOnly cookies, after finding and eliminating an IDOR vulnerability that let any user's data be read by passing their ID as a URL parameter.
- Designed a normalized 8-table PostgreSQL schema with versioned SQL migrations, named CHECK and UNIQUE constraints, and cascade rules mapped to specific HTTP status codes.
- Wrote all data access as raw parameterized SQL with pg and no ORM, built the interface on React Server Components and Server Actions, and deployed to Vercel on Neon serverless Postgres.
- Live: fitness-tracker-eosin-eight.vercel.app

DDoS Attack Visualization Dashboard | React · Supabase · PostgreSQL · Recharts · Tailwind CSS

- Built a custom interactive dashboard (React + Tailwind CSS) visualizing DDoS incident data from a co-authored ML research paper (Random Forest 84%, XGBoost 85% accuracy).
- Implemented authentication-protected admin CRUD workflows backed by Supabase Row-Level Security, and built Recharts data-visualization components for real-time analytics.
- Live: ddos-attack-dashboard.vercel.app

GitHub Career Intelligence | React · Vite · GitHub REST API · Recharts · Tailwind CSS

- Built a custom analytics tool that integrates with the GitHub REST API, using Promise.all for concurrent data fetching across a developer's top 10 repositories.
- Benchmarked byte-weighted language distribution against role-specific checklists sourced from real Canadian job postings to surface skill gaps.
- Live: github-career-intel.vercel.app

EDUCATION

Master of Applied Computing, Wilfrid Laurier University

2024 to 2026 (Completed)

Bachelor of Computer Science, LJ Institute of Engineering and Technology

2020 to 2024
